

*A river is water in its loveliest form;
rivers have life and sound and movement and infinity
of variation,
rivers are veins of the earth through which the life
blood returns to the heart.*

*A river is never quite silent;
it can never, of its very nature, be quite still;
it is never quite the same from one day to the next.
It has its own life and beauty, and the creatures that it
Nourishes are alive and beautiful also.*

Roderick Haig-Brown,
excerpts from "To Know a River" in A River Never Sleeps

Meeting Objectives (Sept 24)

1. Generate input and ideas towards informing program direction and the Draft 2008 RFP;
